Introduction	1
Ten Steps for Color Management	3
1 Choose a Color Space	4
2 Get a Good Monitor	4
3 Create a Good Work Environment	4
4 Calibrate and Profile Your Monitor	4
5 Get a Good Printer	4
6 Create Basic Prints	5
7 Test Your Color Management System	5
8 Create Advanced Prints	5
9 Obtain Profiles	5
10 Adjusting Colors for Advanced Printing	5
What is Color Management?	7
Step 1 – Select a Color Space	13
What is a Color Space?	14
Color Space Options	15
sRGB	15
Adobe RGB	16
sRGB vs. Adobe RGB	17
Some Other Color Spaces	19
ColorMatch RGB	19
ProPhoto RGB	19
eciRGB	20
scRGB	20
Configuring Your Color Space	21
Convert to sRGB	21
Step 2 – Get a Good Monitor	23
Selecting a Monitor	24
Some Specific Monitor Recommendations	27
Laptop Displays	30
Video Cards	31

Step 3 – Create a Good Work Environment	33
The Effect of Environment on Color	34
The Environment Matters	34
Room Lighting	35
Use a Monitor Hood	36
Set Your Computer’s Desktop to Boring Gray	36
Remove Distracting Colors from Your Environment	38
Proofing Light	38
Step 4 – Profile Your Monitor	41
Tools for Monitor Calibration and Profiling	42
Monaco OPTIX & Monaco EZcolor	42
Gretag MacBeth Eye-One	42
ColorEyes Display	42
Calibration	43
Profiling	44
Step 5 – Get a Good Printer	45
Categories of Printer Choices	47
Inexpensive Photo Printers	47
Printing Online with a Photo Lab	48
HP Photosmart Printers	51
Epson UltraChrome Printers	52
Epson K3 Printers	53
Step 6 – Basic Printing	55
Main Elements of Good Printing	56
Using the Printer Driver	57
Use the Printer as it was Designed	57
A look at the Printer Driver	57
Basic Printing	58
Mac Print Dialog	60
Windows Print Dialog	60
Online Printing Services	61
A Color Management Workflow	63
A Basic Workflow	63
Capture using your Working Color Space	63
Converting RAW Files	64
Opening Your Images in Photoshop	66
Identifying the Color Space of Images in Photoshop	67
Convert to sRGB	68
Printing Options from within Photoshop	68

Step 7 – Test Your Color System	71
The Color Test Image	72
Test 1 – Visual Evaluation	73
Test 2 – Compare a Printed Test Image to the Monitor	74
Test 3 – Compare the Printed Test Image to a Print You Make	75
Step 8 – Advanced Printing	77
Outline for Advanced Printing	78
Setup the Soft Proof	78
Resolving Changes to Colors due to the Soft Proof	79
Printing with Profiles	79
Mac Print Dialog	79
Windows Print Dialog	80
On Rendering Intents	81
The Basic Problem – Gamut Mapping	81
Gamut Compression	82
Gamut Clipping	83
The Rendering Intents	83
Perceptual Rendering Intent (Photographic)	84
Relative Colorimetric Rendering Intent (Graphic)	85
The Other Rendering Intents	86
Step 9 – Obtaining Profiles	87
Manufacturer’s Profiles	88
Custom Profiles	88
Making your Own Printer Profiles	89
Installing Profiles	89
Profile Names	90
Step 10 – Adjusting Your Color for Printing	91
Soft Proofing	92
Fixing Color Shifts	94
Paper Color	94
Color Cast in the Profile	97
Resolving Out-of-Gamut Colors	98
Inspection	98
Change Rendering Intent	99
Reduce Saturation	100
Color Mapping with Change Color	101
Index	105
